

Please observe following design changes

**FLSCU16/FLHPS16 is wired identical to SPISCU11/SPIHPS11
with following minor differences:**

**F-STOP uses 2 external NC contacts:
(F-STOP NOT activated --- both contacts are closed)**

**Interlock uses 2 external NO contacts:
(Interlock [door] closed --- both contacts closed)**

**Fault / Reset button:
activated by +24 VDC**
